	FY 2023-24	FY 2022-23	Details of Improvements in
	Current Financial Year	Previous Financial Year	Environmental and Social Impacts
R&D	USD 61,085	Nil	See notes below
Capex	USD 76,34,000	USD 11,127,169	See notes below

Financial Year 2022-23

During the year, 5 of the Company's vessels were retrofitted with Mewis Duct, a device which improves the flow of water on to propeller and thus its efficiency. It also helps in reduction of underwater noise.

During the year, the Company replaced traditional lighting such as fluorescent, halogen and incandescent lights onboard its vessels with energy efficient LED lights on 5 vessels.

For a typical Bulk Carrier or Tanker, loss of energy through hull resistance is around 25-30% and this increases with growth of hull roughness due to bio-fouling. To minimize growth of bio-fouling, the Company has applied superior anti-fouling coatings on 04 vessels during their respective dry dockings. Hull cleaning was carried out in 28 ships and propeller polishing on 34 ships.

Research & Development –

The trials with sustainable biofuel blended VLSFO completed successfully in this fiscal and a complete report from IRS Class was submitted to Flag administration.

Financial Year 2023-24

During the year, 01 of the Company's vessel was retrofitted with Mewis Duct, a device which improves the flow of water on to propeller and thus its efficiency. It also helps in reduction of underwater noise.

02 LR1 tankers were fitted with redesigned propellers which are more efficient than the existing ones.

During the year, the Company replaced traditional lighting such as fluorescent, halogen and incandescent lights onboard its vessels with energy efficient LED lights on 8 vessels.

For a typical Bulk Carrier or Tanker, loss of energy through hull resistance is around 25-30% and this increases with growth of hull roughness due to bio-fouling. To minimize growth of bio-fouling, the Company has applied superior anti-fouling coatings on 08 vessels during their respective dry dockings. Hull cleaning was carried out in 29 ships and propeller polishing on 36 ships.

Research & Development –

- We carried out trials with an in-transit hull cleaning robotic equipment on two of our vessels.
- Also conducting a trial with an ultrasonic equipment for protection of propeller from biofouling on one of our vessels.

2. a. Does the entity have procedures in place for sustainable sourcing?

The Company is into a business of marine transportation of bulk commodities which does not involve sourcing of raw materials as an input for manufacturing any end product. Most of the Company's supplies to vessels are finished products, for example engine spares which are procured from maker or licensee, consumables from reputed oil majors, paint and chemical from manufacturers, general stores from ship chandlers who procure multiple line items from the market, consolidate and deliver them on board. So, in essence, the Company does not procure any raw material as input to our business activities. However, the Company looks for following criteria while selecting its vendor for a prospective business –

- 1) Sourcing from reputable suppliers known in the industry.
- 2) Vendors are maintaining registration under local/ regional laws.
- 3) Vendors are complying to National and International applicable legislations.
- 4) Vendors are maintaining management systems under ISO 9001 and 14001 or any other equivalent systems wherever applicable.
- 5) Suppliers are requested to meet following Company requirements additionally:
 - a) In accordance with SOLAS Chapter 11-1/ Reg 3-5 supplies of materials which contain asbestos are prohibited on all ships and "asbestos free declaration" must be provided with every supply made to the vessel.
 - b) The seller shall guarantee that no hazardous material identified under MEPC269(68) and EUSRR have been used in the supplies.
 - c) The seller shall complete and provide Appendix A1: Supplier's Declaration of conformity and Appendix A2: Material Declaration form along with the items and other technical documentation as per the standard format provided under business associates on www.greatship.com
 - d) Avoid use of plastic for the purpose of packing material. In lieu of which environment friendly packing material to be used. Whenever possible assist vessel in collecting back the packing material if the vessel so requests.

b. If yes, what percentage of inputs were sourced sustainably? **Not Applicable.**

3. Describe the processes in place to safely reclaim your products for reusing, recycling and disposing at the end of life, for (a) Plastics (including packaging)(b) E-waste (c) Hazardous waste and (d) other waste.

The Company is into a business of marine transportation of bulk commodities and do not manufacture any product for sale. However, waste generated on board during normal operation of ship are handled as per vessel specific garbage management plan and landed ashore to approved reception facilities for further processing. Besides last financial year, we supplied 16 more vessels with shredder to improve the management of wastes onboard, taking the total figure to 32 ships. For the e-waste generated at shore offices, the Company has tied up with an approved local recycler. The Company tries to re-use the old laptops as far as possible before opting for disposal to recycler.

4. Whether Extended Producer Responsibility (EPR) is applicable to the entity's activities (Yes / No). If yes, whether the waste collection plan is in line with the Extended Producer Responsibility (EPR) plan submitted to Pollution Control Boards? If not, provide steps taken to address the same.
Not Applicable

LEADERSHIP INDICATORS

1. Has the entity conducted Life Cycle Perspective / Assessments (LCA) for any of its products (for manufacturing industry) or for its services (for service industry)? If yes, provide details in the following format? **Not Applicable.**

NIC Code	Name of Product/ Service	% of Total Turnover Contributed	Boundary for which the life cycle perspective / assessment was conducted (Yes/No)	Whether conducted by Independent External Agency (Yes/No)	Results communicated in public domain (Yes/No) If Yes, provide the web-link.
----------	--------------------------	---------------------------------	---	---	--

2. If there are any significant social or environmental concerns and/or risks arising from production or disposal of your products / services, as identified in the Life Cycle Perspective / Assessments (LCA) or through any other means, briefly describe the same along-with action taken to mitigate the same.

The Company is into marine transportation of bulk commodities where the shipping service has impact on Emissions, Ballast water and Domestic discharges. Below table describes the action taken by the organization to minimize the impact on each of these.

Name of Product/ Service	Description of Risk/ Concern	Action Taken
Shipping	Emissions	<p>The Company abides by the existing regulations and guidelines set by the IMO regarding climate change mitigation and air pollution. It supports their revised climate strategy towards 2050, which aims to reduce CO2 emissions per transport work, as an average across international shipping, by at least 40% by 2030, pursuing efforts towards total GHG emission reduction by 70% by 2040, compared to 2008 levels; and to achieve net zero by 2050 compared to 2008 levels.</p> <p>The Company complies with the International Maritime Organization (IMO) - MARPOL Convention Annex VI which specifically addresses the prevention of air pollution from ocean-going ships. This MARPOL Convention seeks to control airborne emissions from ships including Sulphur oxides (SOx), nitrogen oxides (NOx), ozone depleting substances (ODS), volatile organic compounds (VOC) and shipboard incineration. To reduce emissions, the Company has implemented following:</p> <ul style="list-style-type: none"> • In order to improve air quality and protect the environment, from 1 January 2020, the IMO limit for sulphur in fuel oil used by ships operating outside of emission control areas ("ECAs") was reduced from 3.50% to 0.50%. This dramatic reduction in SOx emitted from ships will provide significant health and environmental benefits around the world, particularly for coastal populations and those living near ports. The Company has reduced the Sulphur oxide (SOx) emissions by following a mixed strategy of using low Sulphur fuel and installation of exhaust gas cleaning systems (EGCS) to comply with the above IMO regulation. • The Company's applicable vessels are in compliance with NOx emission requirements as per MAPROL Annex VI and maintains NOx technical file. • Since 2014, the Company has a dedicated department responsible for vessel performance management. They helped in enhancing fuel efficiency of vessels through advising on retro fitment of energy saving devices and operational measures. The Company's list of emission reduction measures includes installation of Redesigned Propellers, Mewis duct, Propeller Boss Cap fins (PBCF), ECO Cap, LED lighting, use of low friction hull coatings and onboard sensors driven data collection systems in order to enable fuel consumption optimization in real time on selected vessels. • Over the years, the Company has been consistently following fleet renewal program, selling some of our oldest and least efficient vessels and by acquiring modern and efficient ships. This has been an important contributor towards enhancing the energy efficiency of the Company's fleet and reducing its GHG emissions. • For EEXI regulation compliance, company carried out calculation of EEXI values and approvals of EEXI technical file for all company vessels. The vessels for which overridable power limitations were to be installed to meet this EEXI requirements, company contracted with makers and has completed installation on all except one vessel.

Name of Product/ Service	Description of Risk/ Concern	Action Taken
		<ul style="list-style-type: none"> In our research on decarbonization we conducted trials with two technologies. One vessel we installed ultrasonic equipment for protection of propeller from biofouling, the trial is under progress and the expectation is that this will help us avoid regular propeller polishing and will keep propeller free of fouling thereby assist in emission reduction. The second technology, an In-transit hull cleaning robot was tried out on couple of ships, in this technology vessel staff can carry out hull cleaning of vertical sides during vessel's sea passage saving the cost on stoppage and regular hull cleaning. Use of combustion catalysts fuel additives on Company vessels All the Company vessels are complying with regulation 12 of IMO MARPOL Annex VI on Ozone Depleting Substance (ODS). Applicable Company vessels are complying with regulation 15 of IMO MARPOL Annex VI on Volatile Organic Compound (VOC) and have implemented Class approved VOC management plan. <p>To meet the new regulations, Emissions Trading System (ETS) from European Union (EU), your company has contracted with a broker for the purchase & management of EUAs for non-pool vessels and for pool vessels it will be handled by respective pool managers.</p> <p>Our company has been assigned Spanish Registry for opening of Maritime Operator Holding Account for holding and submission of EUA allowances by EU. We have already initiated the process for the same and expect the account to be opened in Q1FY25.</p>
	Ballast water	<p>Ballast water is essential for safe and efficient shipping operations. It reduces stress on the vessel's hull, substituting weight lost due to consumption of potable water and fuel and changes to cargo load. However, loading and unloading untreated ballast water poses serious ecological, economic and health risks as ships become a vector for the transfer of organisms between ecosystems.</p> <p>A ballast water exchange system involves the substitution of water in a ship's ballast tanks using either a sequential, flow-through, dilution or other exchange method which is recommended or made obligatory by the IMO. A variety of technologies are used for ballast water treatment, these include: Filtration (physical); Chemical Disinfection (oxidizing and non-oxidizing biocides); Ultraviolet treatment; Deoxygenation treatment; Heat (thermal treatment) or Magnetic Field Treatment. A typical ballast water treatment system on board ships use two or more technologies to ensure that the treated ballast water is compliant with the IMO standards.</p> <p>As of 31st March 2024, 5% of the Company's vessels are fitted with exchange systems and 95% have installed treatment technology. The Company intends to complete remaining 02 installation of treatment systems by respective vessel's IMO mandated due date.</p>
	Domestic Discharges	<p>Sewage: The discharge of sewage from ships into the sea, can create a health hazard and contribute to marine pollution. Sewage can also lead to oxygen depletion and can be an obvious visual pollution in coastal areas – a major problem for countries with tourism industry.</p> <p>It is generally considered that on the high seas, the oceans are capable of assimilating and dealing with raw sewage through natural bacterial action. Therefore, the regulations in Annex IV of MARPOL prohibit the discharge of sewage into the sea within a specified distance from the nearest land, unless otherwise provided.</p> <p>All the Company vessels are fitted with Flag approved Sewage Treatment System in compliance with IMO's MAPROL Annex IV requirements. Additionally, some ships have holding arrangements to meet the local restriction with respect to discharge of treated sewage.</p>

Total energy consumed from non-renewable sources (D+E+F)	10,122,623.00 GJ	10,501,516.88 GJ
Total energy consumed (A+B+C+D+E+F)	10,122,623.00 GJ	10,501,516.88 GJ
Energy intensity per rupee of turnover (Total energy consumption/ revenue from operations)	2,430.52 GJ/Cr	2,172.06 GJ/Cr
Energy intensity per rupee of turnover adjusted for Purchasing Power Parity (PPP) (Total energy consumed / Revenue from operations adjusted for PPP)	-	-
Energy intensity in terms of physical output	-	-
Energy intensity (optional) – the relevant metric may be selected by the entity	-	-

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

No. The above data is not assessed by independent agency. However, Company's GHG assertion report which is as per ISO 14064-1(2006) Greenhouse gases – Part 1 guidelines is verified by class DNV.

2. Does the entity have any sites / facilities identified as designated consumers (DCs) under the Performance, Achieve and Trade (PAT) Scheme of the Government of India? (Y/N) If yes, disclose whether targets set under the PAT scheme have been achieved. In case targets have not been achieved, provide the remedial action taken, if any.: **Not Applicable.**

3. Provide details of the following disclosures related to water, in the following format:

Parameter	FY 2023-24 Current Financial Year	FY 2022-23 Previous Financial Year
Water withdrawal by source (in kilolitres)		
(i) Surface water	-	-

8. Does the entity have any project related to reducing Green House Gas emission? If Yes, then provide details.

Yes. The Company abides by the existing regulations and guidelines set by the IMO regarding climate change mitigation and air pollution. The Company supports their climate strategy towards 2050, which aims to reduce CO₂ emissions per transport work, as an average across international shipping by at least 40% by 2030, pursuing efforts towards total GHG emission reduction by 70% by 2040, compared to 2008 levels; and to achieve net zero by 2050 compared to 2008 levels.

Since 2014, Company has a dedicated department responsible for Vessel Performance Management. They helped in enhancing fuel efficiency of vessels through advising on retro-fitment of energy saving devices and operational measures which in turn reduced GHG emissions.

Following projects are being planned in future on our ships for reduction in GHG emissions:-

- a) MEWIS Duct
- b) Fitment of redesigned propellers on selected ships
- c) MAN B&W ECO Cam
- d) Use of combustion catalysts fuel additives
- e) LED lighting
- f) Voyage optimization software
- g) High Performance Paints
- h) Periodical hull & propeller cleaning.

9. Provide details related to waste management by the entity, in the following format:

These details are not monitored considering the nature of business of the Company.

Parameter	FY 2023-24 Current Financial Year	FY 2022-23 Previous Financial Year
Total Waste Generated (in metric tonnes)

LEADERSHIP INDICATORS

1. Water withdrawal, consumption and discharge in areas of water stress (in kilolitres):

Not Applicable

For each facility/ plant located in areas of water stress, provide the following information:

- (i) Name of the area.
- (ii) Nature of operations.
- (iii) Water withdrawal, consumption and discharge in the following format:

Parameter	FY 2023-24 Current Financial Year	FY 2022-23 Previous Financial Year
Water withdrawal by source (in kilolitres)

Total water discharged (in kilolitres)		

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency?(Y/N) If yes, name of the external agency.

2. Please provide details of total Scope 3 emissions & its intensity, in the following format:
These details are not monitored considering the nature of the business of the Company.

Parameter	Unit	FY 2023-24 Current Financial Year	FY 2022-23 Previous Financial Year
Total Scope 3 emissions (Break-up of the GHG into CO ₂ , CH ₄ , N ₂ O, HFCs, PFCs, SF ₆ , NF ₃ , if available)	Metric tonnes of CO ₂ equivalent		
Total Scope 3 emissions per rupee of turnover			
Total Scope 3 emission intensity (optional)– the relevant metric may be selected by the entity			

Note: Indicate if any independent assessment/ evaluation/assurance has been carried out by an external agency? (Y/N) If yes, name of the external agency.

3. With respect to the ecologically sensitive areas reported at Question 11 of Essential Indicators above, provide details of significant direct & indirect impact of the entity on biodiversity in such areas along-with prevention and remediation activities. **Not Applicable**
4. If the entity has undertaken any specific initiatives or used innovative technology or solutions to improve resource efficiency, or reduce impact due to emissions / effluent discharge / waste generated, please provide details of the same as well as outcome of such initiatives, as per the following format:

Sr. No.	Initiative Undertaken	Details of the initiative (web-link, if any, may be provided along with summary)	Outcome of the Initiative
1	In our efforts to reduce emissions and conserve the environment, the Company has implemented 84 energy saving & emission reduction initiatives in this financial year on various vessels which includes – 1. Fitment of Mewis duct – 01 2. Fitment of Redesigned Propellers – 02 3. LED lighting – 08 4. High performance hull coatings – 08 5. Hull Cleaning – 29 6. Propeller polishing – 36		Reduction in emissions and improvement in energy efficiency
2	Use of Sewage treatment plant and collection in holding tank within port limits based on local requirements.		Reduction in sea water pollution
3	1. Use of Ballast Water Treatment and Exchange Systems. 2. Use of low friction hull coatings. 3. Hull cleaning & propeller polishing basis the continuous monitoring of ships performance.		Protection of bio-diversity
4	Use of Incinerators, Compactors, Communiter, Shredders and Food waste freezer.		Waste management

4. Does the entity have a business continuity and disaster management plan? Give details in 100 words/ web link.
The BCMS (Business Continuity Management System) was put in place to outline the intent of the Company and its responsibilities and arrangements to ensure continuity of its vital services and critical functions in the event of an emergency or crisis.
